Education

PCET's NMIET	2022 – 2026
B.E. Computer Engineering	SGPA: 8.12
Podar International School	2020
Class X – ICSE Board	90.2%

Experience

Campus Ambassador Intern Pregrad, Inc.	Oct 2024 – Nov 2024
---	---------------------

- Supported Pregrad's institutional outreach initiatives by establishing connections with reputed institutes including COEP, BITS Pilani, BITS Pilani Hyderabad Campus, PICT, AISSMS, and SPPU-affiliated colleges.
- Built and maintained communication with representatives across multiple institutions, contributing to Pregrad's campus outreach and networking efforts.

Projects

Cross-Document Multimodal Q/A for Education	<i>Python, RAG, FastAPI, Streamlit, Ollama</i>	Dec 2025 – Apr 2026
--	--	---------------------

- Built a modular research QA system in Python that retrieves academic papers from arXiv and generates answers grounded in an approved corpus.
- Implemented a controlled RAG-style pipeline with semantic retrieval, local LLM inference (Ollama/Mistral), and structured analytical responses.
- Added reliability layers including citation validation, evidence enforcement, and corpus-boundary checks to reduce hallucinations
- Built a modular research QA system in Python that retrieves academic papers from arXiv and generates answers grounded in an approved corpus.
- Developed a modular client-server architecture using FastAPI and Streamlit, integrating corpus exploration, semantic retrieval, research generation, and downloadable reports.

Nightwing – Intelligent Desktop Scheduling Assistant	<i>Python, FastAPI, Groq, Google Calendar API, PySide6, SQLAlchemy</i>	Aug 2026
---	--	----------

- Built an end-to-end scheduling assistant that converts natural-language requests into structured tasks, manages confirmation states, and executes confirmed events through the Google Calendar API.
- Implemented an LLM-powered extraction pipeline using Groq with structured outputs, deterministic date/time normalization, and state-driven task evaluation to separate interpretation from scheduling execution.
- Developed a Windows desktop client with a system-tray interface, global screenshot capture and floating confirmation or missing information workflows, backed by a modular FastAPI service layer.
- Integrated Google OAuth 2.0 authentication and SQLAlchemy-based persistence for secure Calendar access and reliable tracking of task state across scheduling workflows.

Technical Skills

Languages: Python — C++
Frameworks: FastAPI — Streamlit — PyTorch — SQLAlchemy
Databases: PostgreSQL
Tools: Git — REST APIs
Libraries: Pandas — NumPy
Core Concepts: Generative AI, Large Language Models (OpenAI GPT, Ollama), Retrieval-Augmented Generation (RAG), AI Powered Data Analysis, Prompt Engineering, Machine Learning, Natural Language Processing, Multimodal Inference, Data Engineering, Data Processing

Achievements & Certifications

- **Bharat AI Expert** — Certified by NPCI & NVIDIA, cracked level 2 and attended the level 3 of **Bharat AI Quest Hackathon @ IIT Bombay** invited to Global FinTech Fest 2025 as a student delegate. NVIDIA-backed enablement program.
- **Certifications:** AWS Learning, Great Learning (AI/ML), Infosys Springboard, AICTE, L&T LearnKonnnect.
